Examiner's Reasons for Allowance

The following is an examiner's statement of reasons for allowance:

Referring to claims 1, 7, 13, 15, 21, 27, and 57, the prior art searched and of record neither anticipates nor suggests in the claimed combinations, displaying on the screen of the printing apparatus operation unit a message formed based on message data received by the printing apparatus, the message data received being based on a character message and timing information input by the Web client via the client display screen.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Cited Art

The art made of record and not relied upon is considered pertinent to applicant's disclosure. Seki et al disclose a network printing apparatus comprising a display and operation unit and computers on the network external to the printer that can access the printer and serve as Web clients. Price et al disclose a networked printer that incorporates an HTTP browser as the operator control device, and an external computer that already incorporates an HTTP server to allow remote control of the device from other computers or devices on the network.
